

Christ Church Chilwell Health and Safety Policy

We aim to provide and maintain safe and healthy working conditions, equipment and systems of work for all our employees and voluntary helpers, and to provide any information, training and supervision needed for this purpose.

We aim to ensure the health, safety and welfare of all members of the congregation, contractors, visitors and others who may visit the church, grounds and any associated buildings.

Anyone who has concerns on these matters should immediately make them known to the church Operations Manager, vicar or wardens.

Employees will be consulted about health and safety during their annual appraisal.
